SUMMARY

With **4.5 years** of experience, I specialize in **Full-Stack Development**, covering technologies like **JavaScript**, **React**, **Node.js**, **Express.js** and **MongoDB**. I also excel in using **AWS**, **TypeScript**, **Git**, and **Micro Frontends**, while leading teams and driving efficient solutions in **Blockchain** and **REST API** development.

SKILLS

• JavaScript • TypeScript • ReactJs • ExpressJs • NodeJs • MongoDB • HTML • CSS • Git • AWS • SCSS • Tailwind CSS • Redux • SocketIO • REST APIs • NextJS • Firebase • React Query • Micro Frontend • Blockchain

PROFESSIONAL EXPERIENCE

Frontend Engineer
Aug 2025 - Present

Avail Technology Ltd

- Develop **applications** for the Avail ecosystem, including **explorers**, **bridges**, and **staking dashboards**.
- Implement **responsive**, **pixel-perfect UI designs optimized** for both **desktop** and **mobile** platforms.
- Ensure seamless **functionality**, **scalability**, and **high performance** across all **applications** in the **ecosystem**.

Senior Frontend Engineer
Sept 2024 - Aug 2025

Newfang Network Holdings Pte Ltd (Arcana Network)

- Frontend integration of **Arcana Network's authentication SDK**, enabling seamless **Web3 login** and user **session management** across dApps.
- Fixed front-end bugs and Contributed to the **development** and **optimization** of the **Arcana Chrome Wallet extension**, enhancing user onboarding and asset interaction UX.
- Built and maintained **responsive UI** components for the **Arcana Wallet Chrome extension** using **React** and **Tailwind CSS**.

Senior UI Developer
Apr 2023 - Jun 2024

Cypher Labs (Comdex)

- Developed and maintained **responsive UI** components for **DeFi dashboards** using **React** and **TypeScript**.
- Integrated **APIs** to visualize real-time **blockchain data** with **high-performance** charts and tables.
- Collaborated with **design** and product teams to ensure **pixel-perfect** implementation of Figma prototypes.
- Enhanced frontend **performance** and usability across platforms using best practices in **state management** and **optimization**.

Associate Software Developer
Oct 2021 - Mar 2023

Codezero2pi Solutions Private Limited (Rapid Innovation)

- Built **full-stack** dApps using **React.js** for the frontend and **Node.js/Express** for backend APIs.
- Integrated **Web3** wallets and **smart contract** interactions into React interfaces.
- Developed RESTful **APIs** and **authentication** flows using **Node.js** and **JWT**.
- Collaborated with cross-functional teams to deliver scalable blockchain-based applications.

Website Developer
Oct 2020 - Oct 2021

Techbae Pty Ltd

- Developed and deployed full-stack web applications using **MongoDB**, **Express.js**, **React.js**, and **Node.js**.
- Created **responsive** UI components and **dynamic** pages with **React** and **Redux**.
- Designed RESTful **APIs** and implemented backend logic with **Node.js** and **Express**.
- Managed **MongoDB** databases with efficient schema **design** and **data modeling** for scalable apps.

PROJECTS

Chain Abstraction SDK
React, TS, Vite, Tailwind CSS, Arcana CA SDK (Link)
- Developed the **CA SDK website** to help developers integrate Arcana's **decentralized CA SDK**.
- Implemented **responsive UI** using **React** and **Tailwind CSS** for optimal user experience.

Arcana Wallet
React, TS, Vite, Tailwind CSS, Ether JS (Link)
- Contributed to the development of the **Arcana Wallet** enabling seamless Web3 wallet interactions.
- Integrated secure **authentication** and **Web3 provider** functionality to support dApp connectivity.

Arcana Intent Explorer
React, TS, Vite, Tailwind CSS (Link)
- Developed the **Intent Explorer** to visualize user intents and **on-chain transaction** flows in real-time.
- Integrated backend **APIs** to fetch and display intent **metadata**, transaction **status**, and chain **activity**.

All In Bets
MERN, Micro Frontend, TS, AWS (Link)
- Design and implement a **micro frontend** architecture that allows independent development, deployment, and scaling of different **frontend** modules.
- **Optimize** each micro frontend module for **performance**, focusing on **reducing load times** and improving **responsiveness**.
- Implement secure **authentication** and **authorization** mechanisms, such as **JWT**, to **protect API endpoints**.

Cswap
Next, Node, MongoDB, TS, AWS (Link)
- Design and develop both frontend (**React**.js) and backend (**Node**.js, **Express**) components of the application.
- Integrate blockchain technology with the **MERN stack** to enable decentralized functionality, such as token swaps or **secure transactions**.

Flush
React, TS, Node, MongoDB (Link)
- **Design** and implement **user-friendly** interfaces for seamless interaction with blockchain features.
- Implement **security** measures to protect each micro frontend module from vulnerabilities, such as **cross-site scripting (XSS)** and **cross-origin resource sharing (CORS)** issues.

EDUCATION

BENGAL COLLEGE OF ENGINEERING AND TECHNOLOGY (2016-2020)
- B.Tech (Information Technology)

MANBAZAR RADHA MADHAB INSTITUTION (2015-2016)
- 12TH (Science)

MANBAR RADHA MADHAB INSTITUTION (2013-2014)
- 10TH

CERTIFICATES

- The Complete Web Developer in 2020: Zero to Mastery
- Javascript Practice - Zero to Master.
